Subject: Grenada - Follow Up from Call
Attachments: EasternHeightsContamination_draftx.docx

Ted – Per our discussion from earlier, please provide the following items. Please note that providing this information is voluntary, though it may aid the EPA in future communications and ongoing evaluation/investigation at the Rockwell International Wheel and Trim Superfund Site.

- Please provide your list of clients in the Eastern Heights neighborhood (so we can better coordinate future communications with your clients);
- Please provide any and all sampling data tables, including groundwater, soil, and ambient, sub-slab, and indoor air data, related to contamination in the Eastern Heights neighborhood (this data typically includes the date of sample collection, location of sample (lat/long), depth, water level, chemical name and concentrations (ppb for groundwater, ug/m3 for air), field parameters (pH, temp, turbidity, etc.)) preferably in electronic form, if available;
 - See attached for a “rough draft” of a summary report previously provided to us by Reid Stanford
- Per your statements of alleged intimidation by EPA staff of Grenada community members, including your clients, please provide information of these alleged communications (or references to these communication), including any statements made by MDEQ staff regarding such communication.

At this time, we ask that you send the data records listed in the second bullet above by mail to my address (contact below) rather than scheduling a time for EPA staff to view at your office in Texas. Upon receipt, I will make sure to direct to the appropriate technical staff at the EPA.

Further, as requested, below is the contact information for Franklin Hill:
